

# WINTER IS COMING - GET YOUR AIR CON CLEANED

If it's been a while, there's a good chance something's already growing in there.

## BREATHE EASY THIS WINTER – SHIELD YOUR HOME, SHIELD YOUR AIR

As the temp drops, whatever's hiding in your air con is about to become your new housemate... whether you like it or not. Built-up dirt, dust, and mould don't just sit quietly - they get blasted through every room, affecting your air quality, your health, and making your system work harder than it should. At ShieldPro, we don't just give it a quick once-over. We properly clean your system so it runs the way it's meant to - fresh, efficient, and not quietly sabotaging your sinuses.
